

April 21, 2014

To whom it may concern,

I am privileged to write in support of one of my former students, Jennifer Brummett. Jennifer studied in my classroom and laboratory program for 2 years, during which time I witnessed her tremendous growth and development. She is a hard working student and easily grasps the subject matter presented to her. She continuously strives to achieve more than is asked by adding more functionality and design to assignments given.

Jennifer works well in group situations and adhered to strict deadlines for all of the projects that were assigned to her during my classes. In addition, she took it upon herself to learn additional technologies and perform web research to enhance her learning of the various subjects in which she was enrolled. She is a talented web designer as well as programmer/developer.

I recommend Jennifer for the job for which she is applying with absolute confidence. She has a bright future in the world of software development and technology.

Thank you for the opportunity to respond. If you have any questions regarding this recommendation, please do not hesitate to contact me.

Sincerely,

A handwritten signature in cursive script that reads "Dave Jones".
